PRODUCT FEATURE UPDATE

BREATHE WITH CONFIDENCE

RYCO N99 CABIN AIR FILTERS

The biggest threat to safe breathing inside the vehicle can be 40 times smaller than the width of a human hair and invisible. The easiest way to protect a vehicle's passengers from airborne contaminants is to fit a Ryco N99 MicroShield Cabin Air Filter. It's a medical grade face mask for the vehicle's interior air flow.

TRIPLE LAYER PROTECTION

Ryco Microshield Cabin Air Filters consist of three levels of protection against biological contaminants.

1. Poly-phenol anti-viral layer with natural poly-phenol extracts eliminate virus*, bacteria and allergens
2. Activated carbon odour and gas absorption/barrier
3. Medical grade melt-blown electro-statically charged 0.3 micron layer

Anti-Viral
Anti-Viral agents within the media eliminate airborne virus* from the air flow.
*H1N1/H3N2

Anti-Bacterial
Anti-bacterial agents within the media eliminate bacteria from the air flow and stops it growing in the filter

0.3 Micron
Captures miniscule particles that can penetrate deeper into the respiratory system

Dust & Dirt
Captures dust and dirt particles to keep the indoor environment cleaner

Anti-Mould
Stops mould and fungus spores growing in the filter

Pollen
Captures pollens that aggravate allergies, asthma and hay fever

Ryco MicroShield
N99 medical grade media with 99.7% efficiency @ 0.3 micron. Tested to ISO11155-2:2009

Odour Barrier
Protect against harmful gases, noxious and pet odours, soot, fire smoke and smog

Replacement
Replace the Ryco Cabin Air Filter at least once a year or every 15,000km
