## Breathe with Confidence

The biggest threat to safe breathing inside your vehicle can be 40 times smaller than the width of a human hair and invisible. The easiest way to protect a vehicle's passengers from airborne contaminants is to fit a Ryco MicroShield Cabin Air Filter with N99 media.

### Anti-Viral

Anti-Viral agents within the media eliminate airborne virus\* from the air flow.

\*H1N1/H3N2

### Anti-Bacterial

Anti-bacterial agents within the media eliminate bacteria from the air flow and stops it growing in the filter

### Anti-Mould

Stops mould and fungus spores growing in the filter

### Pollen

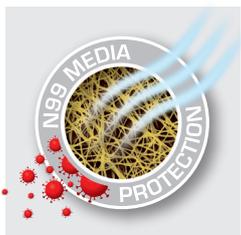

Captures pollens that aggravate allergies, asthma and hay fever

### Dust & Dirt

Captures dust and dirt particles to keep the vehicle interior surfaces cleaner

### Odour Barrier

Protects vehicle occupants from harmful exhaust gases, noxious odours, soot and smog

### Ryco MicroShield

N99 medical grade media layer with 99.7% efficiency @ 0.3 micron. Tested to ISO11155-2:2009

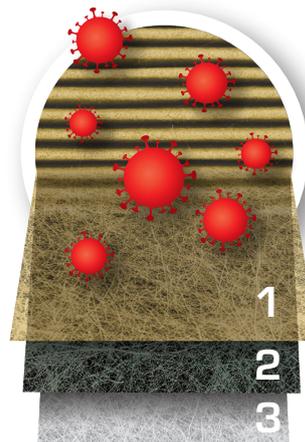

### ≤0.3 Micron

Captures miniscule particles that can penetrate deeper into the respiratory system

### Replacement

Replace the Ryco Cabin Air Filter at least once a year or every 15,000 km

### Ryco MicroShield Protection

Ryco Microshield Cabin Air Filters consist of three levels of protection against biological contaminants.

1. Anti-viral layer with natural polyphenol extracts eliminate virus, bacteria and allergens
2. Activated carbon odour and gas absorption/barrier
3. Medical grade melt-blown electrostatically charged 0.3 micron layer
