

What is the difference between Z794 & Z794A Oil Filters?

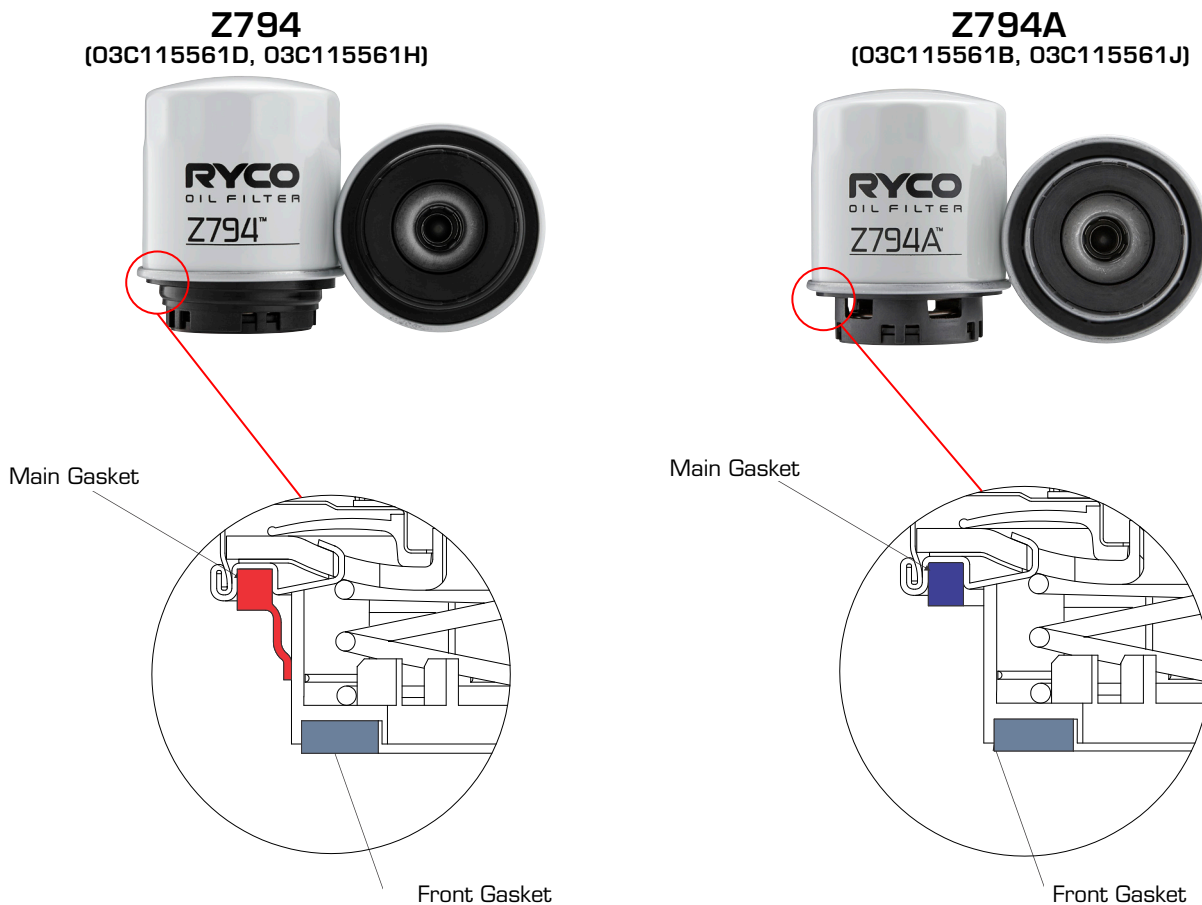

OE uses two versions of a Z794. Ryco has released the Z794A to address specific applications that have slightly different gasket and seal design requirements.

The difference between the two filters is in the main gasket/seal design:

Z794 design (OE X-Ref:03C115561D and 03C115561H) with “shoulder” on the gasket

Z794A design (OE X-Ref:03C115561B and 03C115561J) with “square/flat” gasket design

FITMENT TIP: Having the correct gasket configuration for the correct application is critical. It must be reinforced that the correct torquing of both filters to the OE recommended **20-22 Nm** is required to ensure sealing and prevent leakage.

Z794A is interchangeable with 03C115561B / 03C115561J:

Make	Model	Series	Engine Type	Cylinders	Litres	Engine Model	From	To
VOLKSWAGEN	GOLF	Mk VI 118 TSI	Petrol	4	1.4	CAVD	03/09	06/10
VOLKSWAGEN	GOLF	Mk VI 90 TSI	Petrol	4	1.4	CAXA	03/09	06/10
VOLKSWAGEN	JETTA	1K 118 TSI	Petrol	4	1.4	CAVD	11/09	04/11
